Zenovation A Whole New Zeavola for Better Profitability

Zeavola Resort, located on the northern tip of Phi Phi Island, Thailand, is a small luxury resort held by our group. The resort and its efforts have been strongly introduced by worldwide media including Nation, Cosmopolitan, Safari Magazine and Yahoo Lifestyle (England).

Although a luxury resort, the Zeavola Family has been taking measures and making great efforts to conserve the beautiful and natural environment of the island for guests to enjoy. The bungalows on the resort are maintained and repaired by resort staffs.

As the number of guests visiting Zeavola is rapidly increasing each year recently, Zeavola has decided to carry out an Overall Renovation Plan in 2014 to provide the best satisfaction for the guests. The Zeavola family took the opportunity in May to begin

renovation works of pool villas, wooden walk ways and some grass roof replacements. These are all done by Zeavola staffs in pursuit of attracting more guests for increased profitability. They have received 18,000 pieces of grass roof and wood for the renewal of the pool villas.

The Zeavola Family

Removing Waste from the Island

Zeavola Resort is committed to the conservation of natural environments of the island and will continue to invest in facility improvements to attract more guests for increased profitability.

Please visit Zeavola Resort's official website for more details
